

# BENNETT MCAULAY

San Diego, CA | (858) 888-3907 | ooo@stanford.edu

## EDUCATION

### Stanford University

Palo Alto, CA

B.A. Economics, M.S. Computer Science (Coterm), 3.8 GPA

Anticipated Graduation: June 2027

- Selected coursework: Econ 149 Business Strategy and Economics (case-based seminar, 40-student cap, A+), The Chinese Economy, Advanced Mandarin, CS 124 Natural Language Processing, CS 109 Probability for Computer Scientists, CS 153 Frontier Systems.

## PROFESSIONAL EXPERIENCE

### City of San Jose, Office of Digital Privacy

San Jose, CA

Stanford in Government Fellow

July 2026 - August 2026

- Co-authored the Civic AI Professional (CAIP) credential framework, a two-tier assessment standard for public-sector AI use and development, now under review by the GovAI Coalition's AI Training Working Group, a body drawn from 900+ member agencies across seven countries.
- Drafted the credential's assessment design, graduated retake policy, and evaluator conflict-of-interest rules, and set the two-tier structure separating everyday AI use from AI tool building.
- Audited an XGBoost and Random Forest eviction-risk prediction model for the Housing Department, separating intended design from actual implementation to narrow roughly 38,000 Rent Registry properties into a targeted outreach list.
- Evaluated the equity and effectiveness of city-deployed public safety sensing technology, including camera and audio recorder networks, and helped the office share AI and privacy practices with peer jurisdictions.
- Coordinated imagery acquisition within the City's damage assessment effort.

### Copper Sky Capital

San Diego, CA

Intern

May 2026 - Present

- Led technical and financial diligence on 30+ inbound deals, producing diligence memos, TAM models, and IC-ready materials that surfaced material risks including unverified patents, revenue-engagement inversions, and inflated market-sizing assumptions.
- Led technical diligence on a \$500K investment and participated in onboarding the firm as a new client of the target's proprietary SaaS platform.
- Designed and shipped an automated transcript ingestion pipeline (Power Automate, Zoom API) that polls on a two-hour cycle, discovering, deduplicating, and cleaning recordings across firm accounts.
- Built a portfolio KPI and financial health agent whose human-approval review queue secured partner buy-in for write access. Adopted firm-wide for monthly reporting across ARR, burn, cash, and retention.
- Piloted an email triage agent across three partner accounts and authored the firm's AI data-handling policy governing how confidential third-party information is handled across AI platforms.

### Straus Meyers LLP

San Diego, CA

Product and AI Engineer

June 2025 - August 2025

- As the firm's first AI hire, built Verbatim, an NLP document automation and due diligence tool for litigation workflows, improving firm efficiency by 30% and accelerating evaluation of high-stakes legal assets.
- Ran the system on a secure local-inference architecture using quantized models, an air-gapped vector store, and OCR for scanned records, keeping protected health information on firm hardware.
- Partnered directly with litigation teams to map workflows, identify bottlenecks, and co-develop tailored AI solutions for case preparation, discovery, and compliance tracking across insurer and hospital-system clients.

### Princeton in Beijing Program

Beijing, China

Language Immersion Student

June 2024 - August 2024

- Completed a 60-day intensive Mandarin immersion program at Beijing Normal University under a pledge not to speak English, with advanced coursework, field studies, and travel across six provinces.

## LEADERSHIP AND SERVICE

### Stanford Residential Education

Palo Alto, CA

Resident Assistant and Treasurer, Lantana House

September 2025 - Present

- Resident Assistant to 107 first-year students, and Treasurer for the house, managing the residence budget and endowed fund requests.
- Originated and delivered a residence-hosted Malala Yousafzai lecture at Memorial Auditorium, securing \$140,000 in Riddell Endowed Fund support for the residence's contribution and coordinating logistics across multiple University offices. The event sold out all 1,900 seats.

- Persuaded University staff that a first-year residence could deliver an event at that scale, then ran the cross-office coordination required to do it.

### **Poway Valley Water Polo**

Poway, CA

#### *Coach*

2020 - 2024

- Coached youth water polo across five seasons, running practices, developing players, and managing game-day rotations.

### **Stanford Club Water Polo**

Palo Alto, CA

#### *President*

2025 - 2026

- Led roster, scheduling, travel, and budget for a student-run team competing in regional collegiate play. Third year as a member of the team.

### **Phi Kappa Psi Fraternity**

Palo Alto, CA

#### *Social Chair*

2024 - 2025

- Planned and budgeted chapter social programming across the academic year.

### **Earlier Leadership**

- Eagle Scout. Twelve years in Boy Scouts of America, leading patrols of younger Scouts on extended backcountry expeditions.
- Student liaison to a twelve-member Foundation board of school administrators during senior year of high school, delivering weekly reports of action items and concerns gathered from the student body.
- Captain, high school swim and water polo team.

## **PROJECTS**

---

### **Verbatim | Ollama, Tesseract, Poppler, TypeScript, SQL, Supabase, RESTful APIs**

- Continuing to develop and seek clients for a local-inference legal document tool, running the model on-device and OCR locally so no document ever leaves a client office.
- Built a provenance view and developer console reporting per-model accuracy, needs-review rate, and average inference time.

### **Modern Pentathlon Smart Coach | Python, Pandas, NumPy, Stata**

- Built a five-discipline training assistant optimizing time allocation across disciplines, using maximum likelihood estimation and Monte Carlo simulation over Tokyo 2020 and Paris 2024 Olympic finals data.
- Applied Thompson Sampling to rebalance training recommendations as performance data accumulates.

## **SKILLS AND LANGUAGES**

---

- Technical: Python (Pandas, Scikit-learn, PyTorch), SQL, R, Stata, TypeScript, LLM integration, data modeling.
- Analysis: SaaS metrics (LTV, CAC, churn), financial modeling, statistical analysis, strategic reporting.
- Languages: Mandarin (advanced speaking and reading), German (advanced speaking and writing).
