

Bennett McAulay

San Diego, CA | (858) 888-3907 | ooo@stanford.edu

EDUCATION

Stanford UniversityPalo Alto, CA

B.S. Economics, M.S. Computer Science (Coterm), 3.8 GPAAnticipated Graduation: June 2027

- Leadership and Involvement: Stanford Club Water Polo President, Phi Kappa Psi Fraternity Social Chair, Residential Student Leader (Treasurer) for 107 first-year students, Affiliated Stanford Entrepreneurial Students

PROFESSIONAL EXPERIENCE

Copper Sky CapitalSan Diego, CA

InternMay 2026 – Present

- Led technical and financial **diligence on 9 inbound deals**, including a \$12.5M raise at \$40M pre-money, producing diligence memos, TAM models, and IC-ready materials that surfaced material risks such as unverified patents, revenue-engagement inversions, and inflated market-sizing assumptions across the portfolio.
- Designed and shipped an **automated transcript ingestion pipeline** (Power Automate, Zoom API) that polls on a two-hour cycle, discovering, deduplicating, and cleaning recordings across firm accounts, eliminating manual meeting documentation.
- Built a **portfolio KPI and financial health agent** whose human-approval review queue secured partner buy-in for write access; adopted firm-wide for monthly reporting across ARR, burn, cash, and retention.
- Piloted an **email inbox triage agent** across three partner accounts, and authored the firm's AI data-handling policy governing how confidential third-party information is handled across AI platforms.

City of San José, Office of Digital PrivacySan José, CA

Cardinal Quarter FellowJune 2026 – August 2026

- Co-authored the **Civic AI Professional (CAIP) credential framework**, a two-tier assessment standard for public-sector AI use and development, for the GovAI Coalition's AI Training Working Group spanning 900+ member agencies across 7 countries.
- Audited an **XGBoost/Random Forest eviction-risk prediction model** for the Housing Department, separating intended design from actual implementation to narrow roughly 38,000 Rent Registry properties into a targeted outreach list.
- Evaluated the equity and effectiveness of city-deployed priority public safety sensing technology including camera and audio recorder networks, and helped the Office of Digital Privacy share AI and privacy best practices with peer jurisdictions.

Straus Meyers LLPSan Diego, CA

Product and AI EngineerJune 2025 – August 2025

- As the firm's first AI hire, developed an **NLP document automation and due diligence tool** to streamline litigation workflows, improving firm efficiency by **30%** and accelerating evaluation of high-stakes legal assets
- Built on a **secure local-inference architecture** using quantized models and an air-gapped vector store, keeping protected health information on firm hardware to ensure **strict privacy compliance**.
- Partnered directly with litigation teams to **map workflows**, identify bottlenecks, and co-develop tailored AI solutions for case preparation, discovery, and compliance tracking across insurer and hospital-system clients.

Princeton in Beijing ProgramBeijing, China

Language Immersion StudentJune – August 2024

- Completed intensive **Mandarin immersion program**: advanced coursework, field studies, and travel across six provinces

PROJECTS

Verbatim | Ollama, Tesseract, Poppler, TypeScript, SQL, Supabase, RESTful APIs

- Engineered a **fully local legal document auto-filler** for firms handling PHI, running the LLM on-device through **Ollama** and scanned-PDF OCR through **Tesseract and Poppler**, so no document ever leaves the office.
- Reduced discovery latency by **50%** at high extraction accuracy on 8B-parameter models, with runtime under two minutes.
- Built a **provenance view and developer console** reporting per-model accuracy, needs-review rate, and average inference time.

Modern Pentathlon Smart Coach | Python, Pandas, Numpy, Stata

- Built ML-based personalized five-discipline training assistant optimizing discipline-specific time allocation, using Maximum Likelihood Estimation and Monte Carlo simulation over Tokyo 2020 and Paris 2024 Olympic finals data
- **Applied Thompson Sampling** to dynamically rebalance training recommendations based on **evolving performance data**.

SKILLS & LANGUAGES

- **Technical:** Python (Pandas/Scikit-learn/PyTorch), SQL, R, Stata, TypeScript, LLM Integration, Data Modeling. **Analysis:** SaaS Metrics (LTV/CAC/Churn), Financial Modeling, Statistical Analysis, Strategic Reporting.
- **Languages:** Mandarin (Advanced speaking and reading), German (Advanced speaking and writing). **Leadership:** Agile Project Management, Cross-functional Collaboration, Stakeholder Communication.
